Your maintenance operations, *measured*.

FastInsights gives you live maintenance KPI dashboards pulled from SAP through Arkyn's FastCloud. Track core KPIs like MTTR, MTBF, first-time fix rate, and equipment downtime across plants, and monitor adoption of the FastApp Suite.

With FastInsights.

- ✓ Live KPI dashboards pulled from SAP data.
- ✓ MTTR, MTBF, first-time fix rate, and more by plant.
- ✓ Worst-performing equipment ranked at a glance.
- ✓ Adoption data showing who is using the FastApps.
- ✓ Dashboards update as work is completed in SAP.

Without FastInsights.

- ✗ Stale spreadsheets and manual SAP exports.
- ✗ Metrics scattered across systems and files.
- ✗ No idea if teams are using what you paid for.
- ✗ Problems found after they cause downtime.
- ✗ Weeks of waiting for IT to build a report.

What it gives your team.

Maintenance KPI dashboards: Track MTTR, MTBF, first-time fix rate, and more. Modular dashboards you can filter by plant, time period, or work order type.

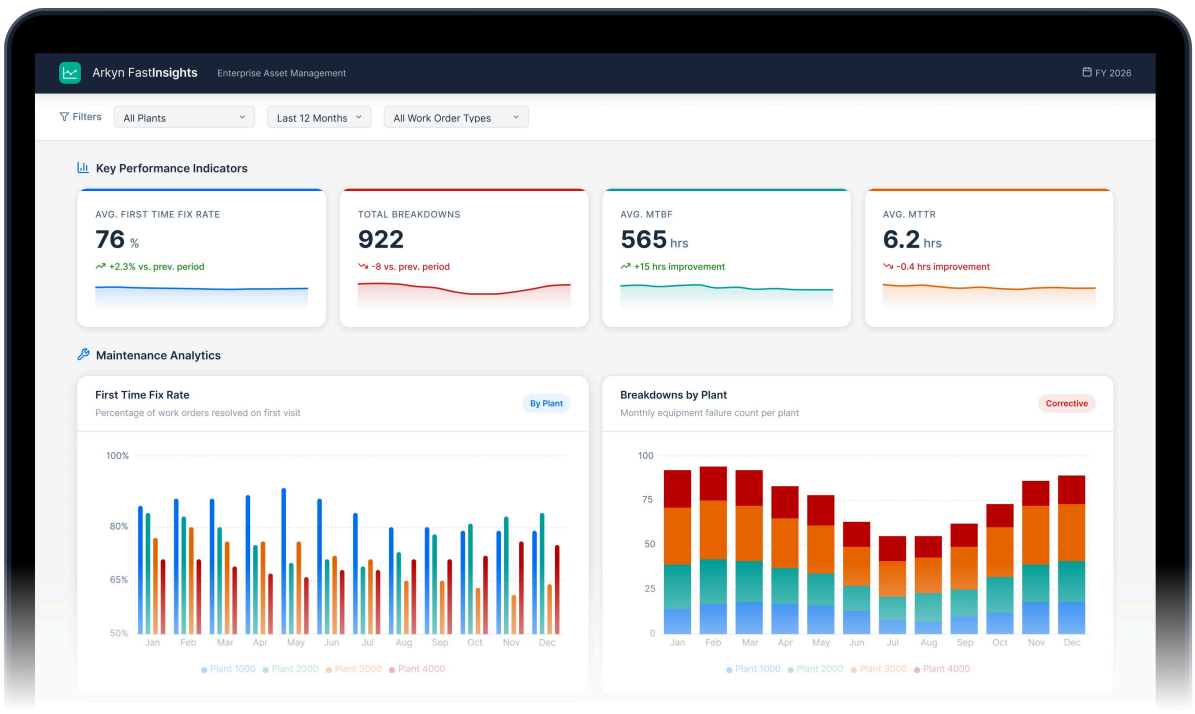
Adoption analytics: See who is using the FastApp Suite, how often, and where usage is dropping off.

AI-powered assistant: Ask questions about maintenance data in plain language and get direct answers.

Equipment risk analysis: Worst-performing equipment ranked by total downtime hours. See breakdown count and status at a glance.

Breakdown and failure trends: View failure counts per plant and compare work order categories over time.

Fast go-live: Pre-built SAP PM/CS coverage through FastCloud. Live in weeks, not months.



15% increase in wrench time.

80% reduction in admin tasks.
