Arkyn FastApp Suite | SAP EAM productivity software

Fast to deploy. Easy to adopt. *More uptime.*

Have you invested in maintenance software that failed to deliver? Arkyn is the EAM productivity suite that is easy to set up and maintenance teams love to use. Arkyn's FastApps cover planning, execution, and insight, and connect to SAP with no core modifications.

With Arkyn.

- ✓ Technicians open the app and start working.
- ✓ Go live in weeks with pre-built SAP coverage.
- ✓ One suite from planning to execution to insight.
- ✓ Data flows to SAP as work happens.
- ✓ No SAP core modifications required.

Without Arkyn.

- ✗ Adoption stalls and the old tools return.
- ✗ Implementations drag on for months or years.
- ✗ Separate tools for every part of the workflow.
- ✗ Reporting happens after the fact, if at all.
- ✗ Customizations create technical debt.

What Arkyn gives your team.

Consumer-grade apps: Native iOS and Android apps for technicians. Easy to use, just open the app and start.

Visual planning that replaces Excel: Live view of workloads and capacity. Move a task and everything adjusts in SAP.

Issue reporting for anyone: Any employee submits a SAP notification from their phone. Scan, describe, and submit.

No signal, no problem: Works without a signal. Data automatically syncs with SAP when connectivity returns.

Pre-built SAP PM/CS coverage: FastCloud deeply integrates Arkyn and SAP for quick setup and no sync issues.

Arkyn's *FastApp* Suite.
